## **Sunflower Extraction (Pellets) 36%**

### Product Description

By product of the extraction of oil from sunflower seeds

Category regulation animal feed

### Specification non contractual

Crude Protein	36.00%
Crude Fibre	16.00%
Crude Fat	2.00%
Ash	6.50%
Moisture	12.0%

### Nutritional Benefit

Sunflower has good protein levels but lower lysine content than soya. It is high in fibre which, if originating from the seed coat, is poorly digested and should be finely ground. Removing the hulls from the meal produces a more digestible product with higher protein level. Rich in sulphur-containing amino acids and phosphorous but low in lysine. Can be included in pig, poultry and ruminant rations.

### Storage and shelf life

When product is stored in a cool and dry environment and ventilated frequently, the shelf life is approximately one year

Country of Origin: Ukraine (Black Sea)

GM Status : No genetically modified sun flowers are grown commercially and none approved for production or importation to the EU.

Traceable back to Dock/Store by the fixing No which accompanies every load delivered

23.02.16
